weinor **AWNINGS**
High-quality sun protection that is always suitable

Resilient and long-lasting: weinor folding arm awnings are a combination of high-calibre design and premium technology. Depending on where you want to install your awning, the desired level of convenience and awning features, you can choose from three awning categories.

Cassette-awnings
The cassette keeps the awning fabric and mechanism as safe as houses – the perfect solution if you're looking for the best-possible way to protect your awning.

Kubata/LED . . . 8
Opal Design II/LED . . . 12
Semina Life/LED . . . 16
Cassita II/LED . . . 18
I/K/N 2000 . . . 20

Semi-cassette awnings
On the semi-cassette awning, the fabric as well as the mechanical parts for the awning roof and retracted drop profile are tucked away safe and sound. For added protection compared to an open awning.

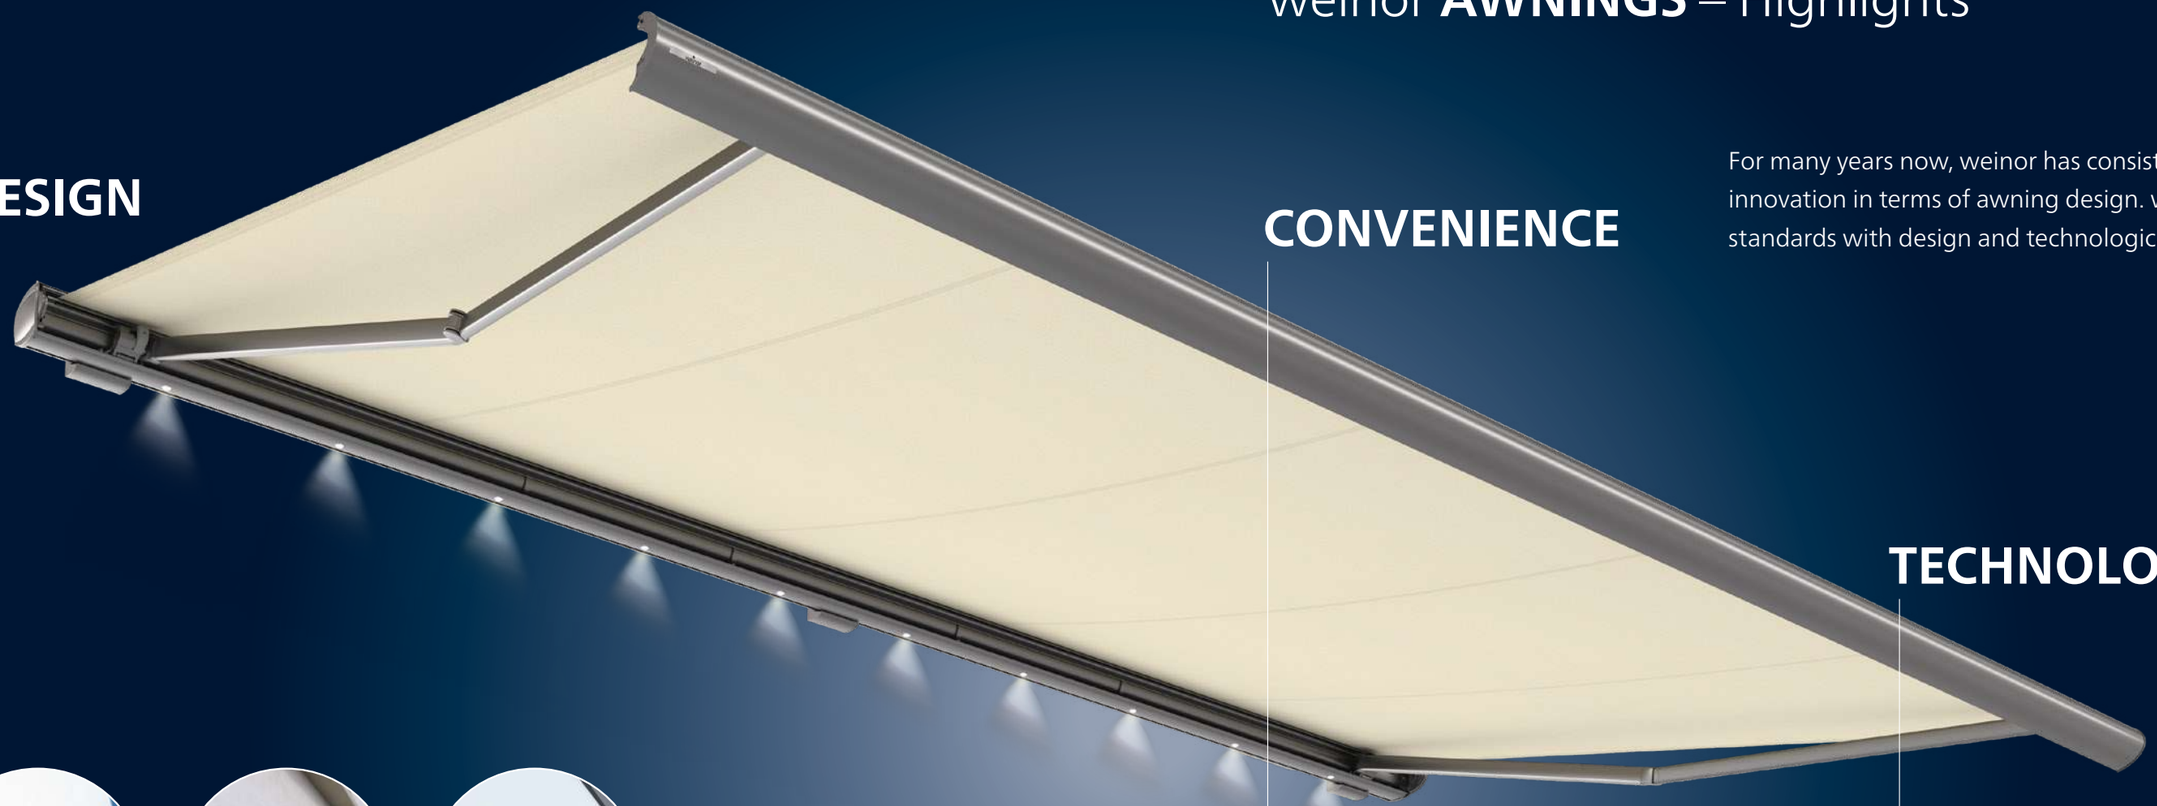
Semina . . . 22

Open awnings
An open awning is at the entry level to weinor's awning world. It is a suitable option if there is an overhang or balcony to protect the awning from the elements.

Topas . . . 24

weinor **AWNINGS** – Highlights

For many years now, weinor has consistently driven innovation in terms of awning design. weinor sets the standards with design and technological features.



DESIGN

Design is a question of style – uncompromisingly beautiful shape
Whether classic or modern, weinor awnings stand out for their high-quality materials and aesthetic look and shape.
The result is ultramodern technology in a contemporary design. Feel free to choose the awning that best meets your personal tastes and furnishings.

CONVENIENCE

For long evenings on the patio – atmospheric LED lighting
Every awning is optionally available with integrated LED lighting or different light bars. Powerful LED spotlights cast a pleasant, warm white light even when the awning is retracted. The particularly energy-efficient dimmable LED spotlights have an operating life of 30,000 hours. Control everything via hard wired switch, remote control using a hand transmitter, Smart Home via smartphone, or automatic weather control sensors.

TECHNOLOGY

True to its name – the weinor LongLife arm
The appeal of the low-noise weinor LongLife arm is its very high tension force – even in gusty conditions. This ensures the fabric is exceptionally well positioned. Its resilient high-tech belt has undergone 100,000 cycles in a fatigue test. We back this up with a 10-year warranty. Drop-forged aluminium has been added to the arm joint for even greater stability.

Frame colour WT 029/80081 | **Pattern** 3-515 alabaster

www.weinor.com/kubata

Frame colour WT 029/80081

KUBATA/LED
clear | consistent | cubic

Cubic shapes are a popular style element for contemporary facades. The Kubata cassette awning blends ideally into these. With its clear design it complements modern architecture perfectly. But the high-quality technology also convinces: dimmable LED spotlights integrated into the cassette, the weinor LongLife arm and the large choice of fabrics and frame colours – leaving nothing to be desired. Control everything via hard wired switch, remote control using a hand transmitter, Smart Home via smartphone, or automatic weather control sensors.

Frame colour WT 029/90146 I **Pattern** 4-685 slate/white

The house and awning in harmony

With its cubic shape, the Kubata cassette awning blends perfectly into modern house architecture as a stylish design element. Due to the flush wall connection, the sun protection and facade also form a balanced symbiosis which meets the highest aesthetic requirements.

Honoured with:

GERMAN DESIGN AWARD WINNER 2019

DESIGN AWARD 2019

Kubata/LED – Highlights and features

Cubic, clean lines – modern contemporary design

The all-round enclosed and robust awning cassette keeps the fabric and other component parts just as well protected from the elements as the controlled rain drainage within the front profile. As a result, you can enjoy your sun protection for many years.

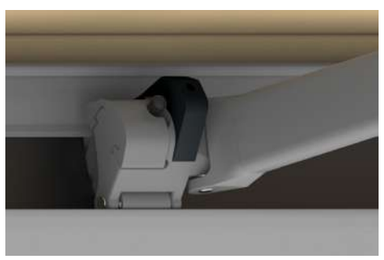
Atmospheric light, powerful warmth

Your options for great comfort: spend pleasant evenings on the patio under LED spotlights that are integrated in the awning cassette. You can even enjoy your patio at cooler times with the Tempura Quadra Universal heating system. It can be retro-fitted and is unobtrusively fitted to the house facade. Everything is dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet.

weinor LongLife arm – guaranteed to be resilient and durable

The LongLife arm on the Kubata is extremely quiet, lightweight and yet extremely robust due to the use of drop-forged aluminium.

- exceptionally durable high-tech belt with over 100,000 cycles in fatigue test
- 10-year warranty
- for exceptional fabric positioning



Wind lock safety device – well-sheltered even in winds

Proven technology prevents the awning from lifting up when wind gusts from below:

- Tilting folding arm with wind lock safety device
- Proven, maintenance-free technology
- Forged and extruded aluminium components

Opal Design II/LED
Live it up on your patio

High-performance technology meets high-calibre design – the weinor Opal Design II meets all the demands of a premium cassette-awning. Built to shade large areas, its timelessly classic shape blends in perfectly with any style of architecture. The beautifully-shaped cassette adds some refined sophistication to the facade. A wealth of product highlights makes the awning easy to use, outstandingly convenient in its operation and durable.

The first-class awning with great features

With Valance Plus and integrated LED lighting, the Opal Design II lives up to the highest demands. Multi-section units convert even large patios into well-shaded favourite areas.

Honoured with:

German Design Award SPECIAL MENTION 2014

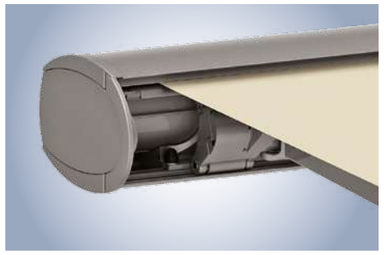
iF product design award 2014

Opal Design II/LED – Highlights and features

Classic design for those who enjoy spacious patios

Large, powerful and safe – the Opal Design II has enough to convince even the most demanding patio aficionados.

- timelessly classic design
- certified up to wind force 5
- with weinor LongLife arm (10-year warranty)



End cap closure – unique and safe closing mechanism

If you can see the spring loaded clips at the end of the cassette are closed, then the awning is reliably protected against the elements and dirt.

- crescent-shaped cap closes securely
- unique, patented solution made by weinor

Integrated LED lighting for long evenings on the patio

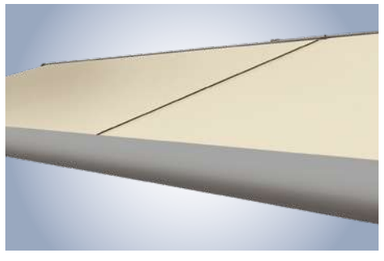
The Opal Design II LED casts an atmospheric, warm white light for even longer hours of enjoyment on the patio.

- operating life of 30,000 hours
- highly energy-efficient
- dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet
- can be used even when awning is retracted

Valance Plus – more privacy, more glare protection

With its vertical awning, the Opal Design II Valance Plus provides the best-possible privacy, anti-glare and sun protection.

- valance height up to 210 cm
- patented weinor Opti-Flow-System® for the ideal fabric positioning
- practical control – via weinor BiConnect even with table retraction protection



Multi-section units to shade especially large areas

On combined multi-section systems, two sections of fabric are connected to one motor. This means they can both be operated at the same time (does not apply to Valance Plus option).

- for spacious patios up to 48 m²
- jockey cover as connector between the units
- LED spotlights asymmetrically distributed on coupled units

Semina Life/LED
A genuine all rounder

Semina Life is the all rounder amongst cassette awnings. It stands out with it's fresh design, modern clean lines and many features. This combined with weinor's tried and tested technology make it such an attractive alternative to semi cassette awnings. Its many unique technical highlights provide superb sun protection, comfort and a long operating life.

Honoured with:

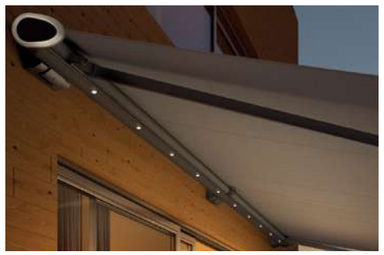
reddot award 2016
winner

Semina Life/LED – Highlights and features

Youthful design with state-of-the-art technology

The Semina Life cassette protects the awning against the weather. The beautifully shaped stainless steel look headplate rings perfectly round off your customised combination of frame colour and fabric pattern.

- modern, clear design
- innovative closing of the awning causing practically no wear at all



Semina Life LED – cassette with integrated LED lighting

The LED spotlights integrated into the cassette produce atmospheric lighting on the patio.

- operating life of 30,000 hours
- highly energy-efficient
- dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet

Valance Plus – vertical privacy and sun protection

The Valance Plus is elegantly integrated into the awning's front profile. It provides privacy and glare protection even with a low-lying sun.

- continously extendable up to 210 cm
- patented weinor Opti-Flow-System® for the ideal fabric positioning
- practical control – via weinor BiConnect even with table retraction protection

Cassita II/LED
A jewel amongst cassette awnings

Slim design and jam-packed with technology – with its puristic shape and ultra-slim cassette, the Cassita II is a perfect match for modern domestic trends. With numerous options for added comfort and convenience.

Honoured with:

Focus Open 2014
Silver

product design award 2014

reddot award 2014
winner

Cassita II/LED – Highlights and features

Youthful living with slim cassette design

For contemporary home decor aficionados: the outstanding feature of the Cassita II is its puristic, harmoniously flat, oval-shaped design

- beautifully-shaped aluminium end caps
- concealed fixings and screws
- easy end fix installation with only two brackets

Gap infill profile for a seamless look

If you prefer a uniform look, you can close the gap between the awning cassette and the wall upon request with a gap infill profile.

- continuous design, also without LED lighting
- harmonious attachment option for the remote receiver (instead of a box)

High-performance technology in minimal space

Fully sheltered: inside the cassette is the very latest in weinor awning technology.

- durable and very quiet weinor LongLife arm (10-year warranty)
- torsion-resistant Optinut tube ensures ideal fabric positioning

LED lighting – long evenings on the patio included

Pleasant summer evenings on your patio – the Cassita II LED provides warm, white atmospheric LED light.

- highly energy-efficient
- operating life of 30,000 hours
- dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet
- can be used even when awning is retracted

I 2000/K 2000/N 2000
Proven technology, timeless design

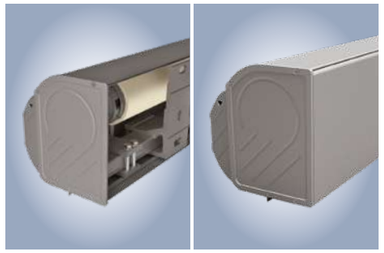
The I 2000 and K 2000 cassette-awnings are true classics. With these weinor offers solutions for any type of building – available with or without a back profile. The N 2000 was especially designed for alcoves, shop fronts and niche installations.

I 2000/K 2000/N 2000 – Highlights and features

Flexible all-rounders for any facade

With its classic proportions and extensively tested concept, this cassette-awning is the ideal fit for any type of building.

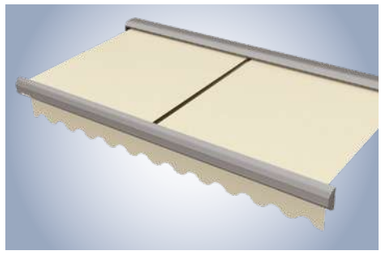
- 1-unit systems up to 7 m in width with 4 m projection
- durable and very quiet weinor LongLife arm (10-year warranty)



Perfect protection and versatile installation

Once the awning is retracted, both the fabric and the mechanical parts are safely protected inside the cassette. A number of versions are available depending on where the awning is to be fitted.

- K 2000 with fully closed cassette for any type of building
- I 2000 without rear wall profile, for wall installation



Multi-section units for large patios

Coupled 2-piece constructions are suitable for particularly large patios and can be controlled via cables, remote controllers or Smart Home, via hand transmitters, smartphones or automatic weather systems.

- for sun protection up to 12 m wide and a projection of up to 4 m
- continuous fabric, or jockey cover to join two sections of fabric

N 2000 – the specialist awning for niche installations

The ultraflat front profile on the N 2000 makes it the ideal choice for installation in facade niches.

- front profile fits flush with the wall or facade
- tilting arm closure assembly ensures the front profile closes very precisely

Semina
Youthful design meets potent technology

The compact Semina semi-cassette is great in price, functionality and design. If offers a straightforward design and outstanding quality.

Semina – Highlights and features

The compact semi-cassette – fresh, youthful aesthetic appearance

Here, the semi-circular cassette profile together with large front profile ensure the fabric and mechanical parts remain dirt-free.

- compact shape
- durable and very quiet weinor LongLife arm (10-year warranty)

Energy-efficient – the optional LED light bar

Even more hours of enjoyment on your patio – the optionally available LED light bar provides a pleasant warm white light in the evenings.

- highly energy-efficient
- operating life of 30,000 hours
- dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet
- can be used even when awning is retracted

Wind lock safety device – protecting your awning

The weinor tilting folding arm with proven wind lock safety device prevents the awning from being lifted up by the wind.

- proven, maintenance-free technology
- all components made of forged and extruded aluminium

Semina

max. width	max. projection

Topas
The classic entry-level model

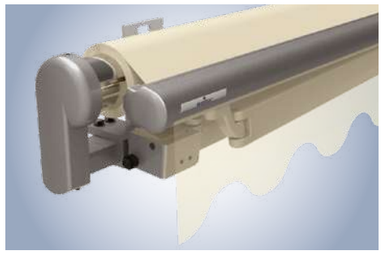
High on quality, low on budget – the weinor Topas open awning is the perfect model to get you started. As it comes with several options, you'll always find a matching Topas no matter the type of building.

Topas – Highlights and features

Durable and practical – the low cost entry level awning

With a trendy fabric from weinor's extensive fabric collection, the open awning Topas creates a homely atmosphere.

- 1-unit systems up to 7 m in width with 4 m projection
- durable and very quiet weinor LongLife arm (10-year warranty)
- awning also available with an aluminium top profile which protects the fabric from the elements

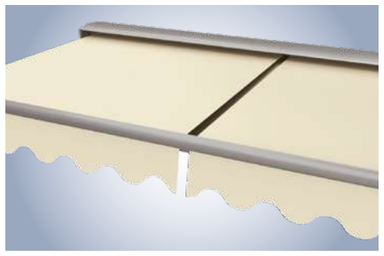


For all types of structures

As an open awning, the Topas is an especially good fit in niches, alcoves and below balconies. Available in numerous different versions.

Possible mounting options:

- wall mounting
- ceiling mounting
- rafter mounting



Multi-section units – to shade especially large areas

The Topas also comes as a combined multi-section unit for very large terraces.

- as a 2-unit systems up to 12 m
- continuous fabric, or jockey cover to join two sections of fabric

Topas

The right control unit to suit all needs

Whether hard wired, remote control or Smart Home, using a hand transmitter, smartphone or automatic weather control – control your awning and accessories really effortlessly with weinor BiConnect or Somfy control units. A gear drive is also possible. The LED lighting and heating can be dimmed fine-tuned via remote control or Smart Home. Your weinor retailer will be happy to advise you competently.

weinor BiConnect

weinor hand transmitter BiEasy

weinor wall-mounted transmitter BiEasy

Somfy hand transmitter Situo Pure II

Somfy wall-mounted transmitter Smoove Pure Shine

Somfy Smart Home Centre TaHoma Switch & app

Which control unit fits your needs?

Manual – operation via gear handle

You'd like to operate your awning manually and under your own steam? With a gear handle, it is independent of a power source and can be attached very flexibly at almost all installation locations.

Basic – operation with a hard wired switch or automatic weather system

You would like to operate your weinor awning comfortably via a hard wired wall switch? Your motorised awning can be effortlessly extended and retracted with a simple switch. Optionally, an automatically controlled unit can be used with a sun, wind and rain sensor instead of a hard wired switch.

Comfort – operation with a remote controller plus dimming heating and lighting

You would like to control your weinor awning comfortably via remote control from the patio or the house? That's pretty easy with a remote controller. Optionally, the lighting and the radiant heater can be activated with it and even be dimmed. You can also operate vertical sun protection or further awnings on the house centrally by this means.

Smart – operation with a smart phone, language assistant or pre-set

You would like to network your weinor awning, lighting, radiant heater and other accessories with the further technology in your home and control it from everywhere via a smartphone or tablet? That's child's play with the Smart Home Centre Somfy TaHoma Switch! Also if you would like to operate it via a language assistant or a pre-set automatic scenario.

Please note that the weinor BiConnect and Somfy systems cannot be combined.

More comfort with **side awnings**

Paravento – side privacy screen at a flick of the wrist

Our extendable side screen provides a further possibility to better enjoy more privacy: Paravento provides wind and privacy protection and its fabric and colour can be matched to your awning.

The **fabric** makes the awning

Breathtakingly beautiful and long-lasting: Our wide range of fabric patterns brings a cosy atmosphere outdoors – uniquely and specifically suited to your individual style and taste.

Attractive awning fabrics to suit every taste

The exquisite my collections 2 fabrics captivate with exciting, new weaving effects, state-of-the-art colouring as well as 12 exclusive patterns – for modern outdoor living or the classical home style.

modern basics blue®
The first sustainable awning fabrics designed by weinor were accoladed alone with 7 design and sustainability prizes. We have now expanded them as a collection – for everyone who really cares about the future.

ever**more**
Innovative patterns with novel structures provide timeless, harmonious fabrics in beige and grey with an individual touch. With new interpretations of the trend topic grey, fans of classical colours absolutely get their money's worth.

hi **hello!**
Colourful fabrics with innovative weaving accents provide your outdoor living space with vitality and joy with their sunny atmosphere. If you like to provide strong colour accentuation with your awning fabric, you can find a wide selection of lively patterns here.

Vertical sun protection fabrics with a crystal-clear view

weinor vertical awnings reliably protect the patio and indoor rooms against overheating and your privacy against prying eyes. We recommend the screens by weinor® collection for this application.

It encompasses three different,high-quality fabrics: StarScreen, Soltis® and fibreglass screen. They all offer perfect sun protection and privacy for windows, the patio and balconies. Different degrees of transparency and to how much air is let through are possible, depending on requirements.

Note: Soltis® fabrics are not available for VertiTex II Zip.

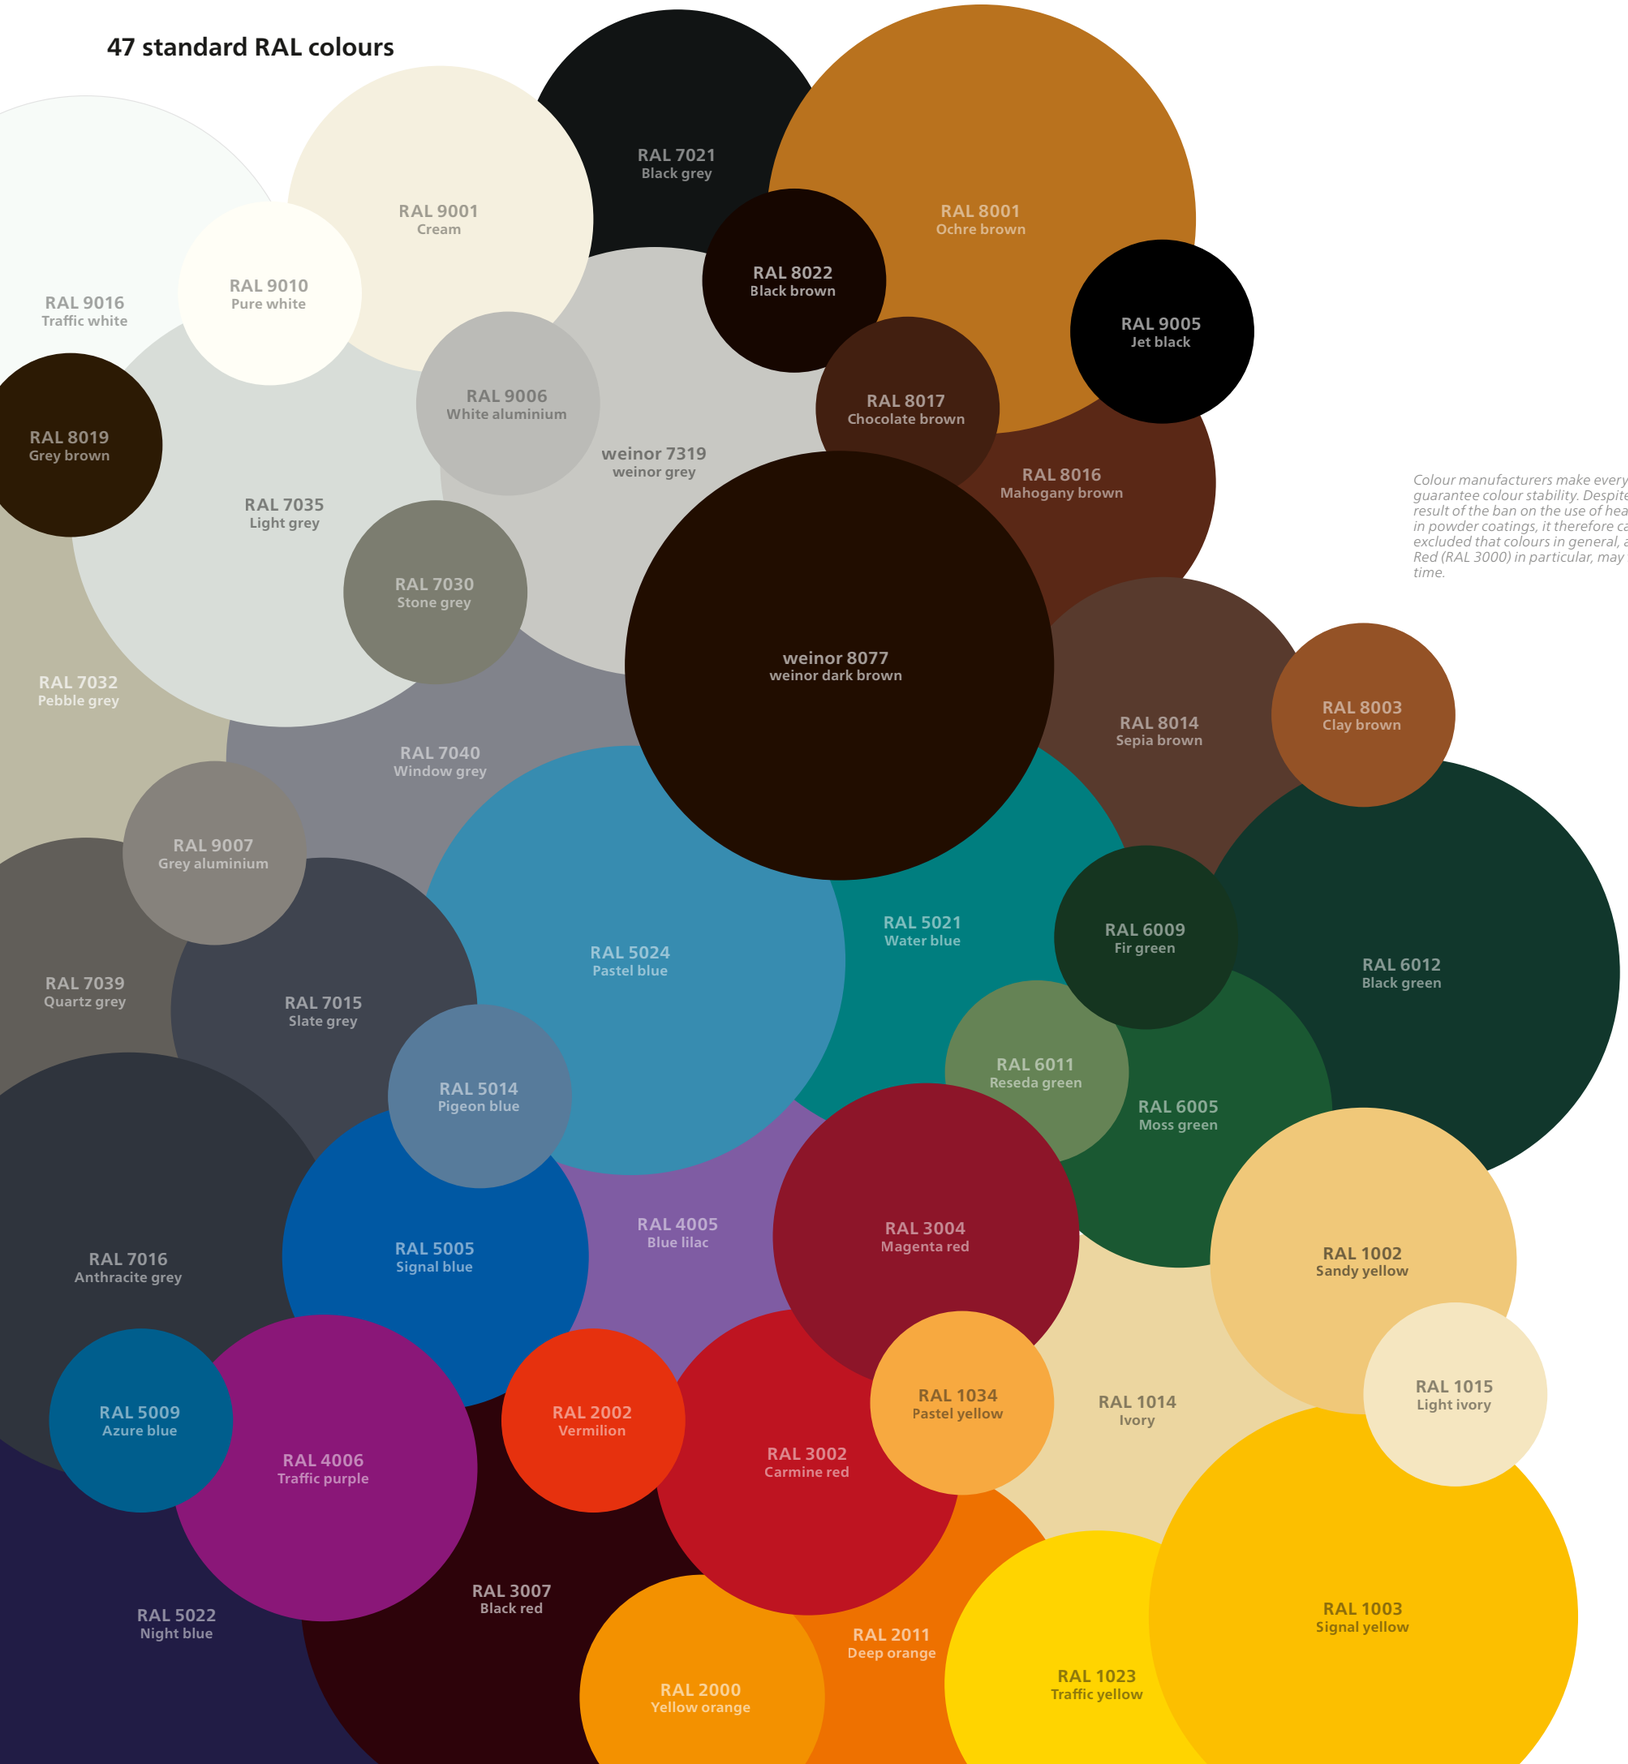
You can find further manufacturers' information for our awning fabrics and the Industrieverband Technische Textilien, Rollladen, Sonnenschutz [Industrial Association for Technical Textiles, Roller Shutters and Sun Protection] (ITRS e.V.) under: **www.weinor.com/fabric-qualities**

my collections 2
High-quality awning fabrics

Precisely **my fabric!**

modern basics blue® · ever**more** · hi **hello!**
You can find your favourite pattern in our 3-part collection. Select a proven woven awning cover or our uncompromisingly high quality fabrics made from recycling material. No matter whether you're looking for timelessly harmonious colours or creative trends – we have the right fabric for all styles and each weinor awning.

47 standard RAL colours



Colour manufacturers make every effort to guarantee colour stability. Despite this, as a result of the ban on the use of heavy metals in powder coatings, it therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time.

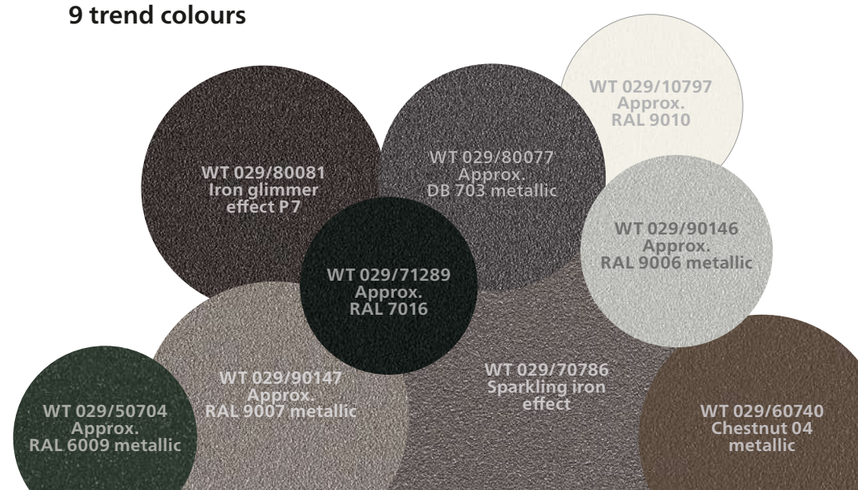
Over 200 modern **frame colours**

Maximum colour safety: weinor has over 200 different frame colours for you to choose from. You can choose from diverse colours which harmonise with the architecture.

Identical colours – for a perfect match
As weinor does all the powder coating in its own workshop, you can also rest assured that different weinor products come with the same top-class colour tonality and identical gloss level.

Choose from an abundance of high-quality colours:
- 47 standard RAL rack colours, silk gloss
- 9 scratchproof, resistant trend colours with an elegant textured look (standard)
- over 150 special RAL colours

9 trend colours



Awnings: Good to know before you buy!
Benefit from the experience of our weinor retailers – up-to-date, professional and practical!

weinor certificate of authenticity

Every weinor product is delivered with a certificate of authenticity.
Ask your weinor retailer for it!

Important:
All the illustrated equipment is weatherproof outdoor furniture and accessories.

Fabric qualities: *weinor awning fabrics meet strict quality requirements and are produced using state-of-the-art production technology. Despite this, blemishes like creases, rippling in the seam and hem area, overstretching in the hem area and honeycombing cannot be ruled out. This has no negative impact on the quality and operating life and are not a reason for rejection.*
For more detailed information:
www.weinor.com/fabric-qualities

Awnings and conservatory awnings: *must be retracted during rain an d windy conditions – otherwise there is a risk of water pooling on the fabric. Fabrics that are allowed to become wet may show creasing, wrinkling or honeycombing as well as having visible water stains. Mould and mildew damage is also a possibility. If taken away wet the awning should be extended as soon as possible once there are dry conditions.*

Frame colours: *depending on the frame colour ordered, we deliver all small parts, as well as gear handles and gear boxes in black (similar to RAL 9005), white (similar to RAL 9016), or in grey (similar to weinor 7319).*
